Natural Henna Powder

100% Natural Hair Colors

Henna Based Hair Colors(low% chemical)

Indigo Hair Dye

Indian Herbs

Natural Henna Powder

Our natural henna Powder is drawn from henna leaves grown on an evergreen shrub 3" to 5" big which is slow growing, brilliant green, foliage, dense and compact with dainty. The henna leaves of this shrub are dehydrated naturally and then finely meshed to get the high quality henna natural powder.

100% Natural Hair Colors

We manufacture 100% natural hair colors in bulk quantity. These natural colors contains pure henna leaf powder and come herbal extracts. It has no PPD, no ammonia & no barium and as such if you are allergic to any of these chemicals, then you are the target customer for us. It is very simple to apply like henna.

Henna Based Hair Colors(Low% Chemical)

We manufacture henna based hair colors(low% chemical) in bulk quantity. These henna based colors contains pure henna leaf powder and low% chemical. After dilution chemical content remains less than 3% and it is safe & secure for hair dying. Our henna based colors makes hair glossy & strong.

Indigo Hair Dye

We manufacturer best quality indigo hair dye. Our Indigo hair dye is a natural dye and made by pure Indigofera tinctoria leaves. We use indigo powder to naturally deepen the intensity of our natural hair colours. There are no added chemicals, dyes, or perfumes. This indigo powder is 100% safe for hair coloring.

Indian Herbs

We export herbs powder like Amla, Shikakai, Manjistha, Baheda, Bhringraj, Neem, Hibiscus Powder, Brahmi, Reetha(soap nut), Tulsi-Basil, Rose petal powder, Harad, Multani mitti, Arnica in powder form. These are use for hair scalp treatment. They are effective to against hair loss, balding, cures alopecia.

INDIGO FOR HAIR DYE

We manufacture natural indigo powder for hair dye. This indigo powder is 100% natural and made by pure *Indigofera tinctoria* leaves. Indigo is a deciduous shrub, It grows in subtropical regions and temperate areas of India and requires plenty of light. Indigo is grown from seed and is harvested bi-annually.

Indigo plant grows to one to two meters high with small green leaves and purple colour flowers. The mature plants are cut off just above the soil, and allowed to dry in the open fields for three or four days.

The leaves are collected, crushed and stored. The crushed leaves are pulverized to a powder. Indigo is an ancient dye plant known for the clarity and fastness of the blue colour. This is the dye traditionally used to natural hair colours.

Our indigo hair dye is a natural dye from Indigo Powder. We use indigo powder to naturally deepen the intensity of our herbal hair colours. Indigo oxidizes when exposed to air and water so when the hair colour is mixed with hot water ready for use the indigo is activated.
